SUMMARY

Accomplished Java Developer and coding enthusiast with top 32% ranking on LeetCode, combining strong algorithmic problem-solving skills with practical development experience. Demonstrated expertise in building scalable applications using Spring Boot and microservices architecture, improving system efficiency by 10%. Proficient in data structures, algorithms, and full-stack development with proven track record of handling 1M+ monthly transactions and enhancing user satisfaction by 15%.

SKILLS

Languages: Java, C/C++, Python, JavaScript, TypeScript, SQL

Frameworks & Libraries: Spring Boot, Spring MVC, Spring Security, Hibernate, Spring JPA, React

Database: MySQL, Postgres, MangoDB, Redis

DevOps: AWS (EC2, S3, RDS), Docker, Kubernetes, Jenkins, Continuous Integration/Continuous Deployment (CI/CD), GCP

Tools: Git, Apache Kafka, RabbitMQ, Mockito, Test-Driven Development (TDD), Integration Testing, JUnit, Microservices, Web Services, Agile/Scrum, Json, Maven, Gradle, Microsoft Azure, JIRA, unit test, Selenium, Postman, Linux/Unix

WORK EXPERIENCE

Exsentra Innovation Limited

Junior Java Software Engineer

Dhaka, Bangladesh

August 2023 - August 2024

- Designed and implemented Java applications improving system efficiency by 10%, delivering 2 major projects.
- Enhanced web application functionality leading to 15% increase in user satisfaction.
- Built scalable solutions using AWS, Spring Boot, and React with 99% uptime.
- Implemented secure authentication and containerized applications using Docker.

PROJECTS

Personal Portfolio - [Link to project](#)

- Built a full-stack web portfolio using Spring Boot and React, serving 500+ users.
- Implemented CRUD operations and role-based authentication.
- Deployed containerized application on AWS with 99% uptime
- Tech Stack: Spring Boot, React, MySQL, Docker, AWS, HTML, CSS

Smart Bank - [Link to project](#)

- Developed digital banking application processing 1M+ monthly transactions.
- Integrated AI chatbot and reduced response times by 20% using Redis caching.
- Implemented secure payment processing and PDF statement generation
- Tech Stack: Spring Boot, MySQL, Redis, Swagger UI, REST API.

Hotel Rating System - [Link to project](#)

- Created microservice architecture handling 50K+ monthly user requests.
- Implemented multi-database system supporting 100K+ daily queries.
- Built real-time rating system processing 200K+ monthly requests.
- Tech Stack: Spring Boot Microservices, Back-end, MySQL, PostgreSQL, MongoDB.

EDUCATION

University of Essex

Master's, Data Science

January 2022 - March 2023

GPA: 1

- Text Analytics, Data Analysis, AI/ML, Database Management, Natural Language Processing (NLP).

North South University

Bachelor's, Computer Science

January 2016 - January 2021

GPA: 1

- Data Structures, Algorithms, Software Engineering, Operating System, Object Oriented Programming, Discrete Maths.

ACHIEVEMENTS & CERTIFICATIONS

- Top 32% coder in LeetCode Global contests ranking.
- Ranked 7th in NSU intra-programming contest.
- Published research paper in Vietnam Journal of Computer Science.
- 500+ DSA problems solved in various online judges including Hackerrank, and Codeforces.
- Specialized in: Dynamic Programming, Graph Algorithms, System Design
- Completed Master Spring Boot 3 & Spring Framework 6 certification.
- Maintained consistent high performance in academic and professional projects
